

## SolarInnovate Energy Solutions

# 30kW flywheel energy storage

## Overview

---

What is the largest flywheel energy storage system in the world?

Image: Shenzen Energy Group. A project in China, claimed as the largest flywheel energy storage system in the world, has been connected to the grid. The first flywheel unit of the Dinglun Flywheel Energy Storage Power Station in Changzhi City, Shanxi Province, was connected by project owner Shenzen Energy Group recently.

Where is China's first large-scale flywheel energy storage project located?

China has successfully connected its 1st large-scale standalone flywheel energy storage project to the grid. The project is located in the city of Changzhi in Shanxi Province. The power output of the facility is 30 MW and it is equipped with 120 high-speed magnetic levitation flywheel units.

What is China's first grid-connected flywheel energy storage project?

The 30 MW plant is the first utility-scale, grid-connected flywheel energy storage project in China and the largest one in the world. From ESS News China has connected to the grid its first large-scale standalone flywheel energy storage project in Shanxi Province's city of Changzhi.

What is the Dinglun flywheel energy storage power station?

The Dinglun Flywheel Energy Storage Power Station, the World's Largest Flywheel Energy Storage Project, represents a significant step forward in sustainable energy. Its role in grid frequency regulation and support for renewable energy will help stabilize power systems as China continues to increase its reliance on wind and solar energy.

What is China's largest flywheel energy storage plant?

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.

Who financed China's largest flywheel energy storage system?

The project was developed and financed by Shenzhen Energy Group. Image: Shenzhen Energy Group. A project in China, claimed as the largest flywheel energy storage system in the world, has been connected to the grid.
