

## SolarInnovate Energy Solutions

# 48v200A inverter

## Overview

---

What is a victron Quattro 48 15000?

Fast shipping and secured well in shipping crate The Victron Quattro 48/15000 is a high-capacity inverter charger designed for robust off-grid and hybrid solar systems. It features a 48V input, providing 15000VA (15kVA) output at 230V, with a powerful 200A charger and a built-in transfer switch.

What is a quattro inverter?

Become a Victron dealer and save on every order. The Quattro 48/15000/200-100/100 is a robust and powerful 48-Volt 15,000-Watt pure sine wave inverter with an adaptive 200A battery charger and two 100A AC inputs. The inverter's output is 277V AC for 3-Phase power systems. Quattro and Multiplus inverters/chargers share many great features.

How many AC inputs can a PowerAssist inverter accept?

Additionally it can accept two AC inputs and automatically connect to the active source. Its many features include a true sine wave inverter, adaptive charging, hybrid PowerAssist technology plus multiple system integration features such as three or split phase operation and parallel operation.

What is a quattro 48 15000/200-100/100?

The Quattro 48/15000/200-100/100 is a robust and powerful 48-Volt 15,000-Watt pure sine wave inverter with an adaptive 200A battery charger and two 100A AC inputs. The inverter's output is 120V AC.

How many Quattro inverters do I Need?

Stack two Quattro inverters to build your 240V split phase system, or configure three inverters for a 3-phase system. You can have up to six inverters in parallel per phase, significantly increasing the system's capacity.

Can a single phase inverter output 240V 60Hz?

These single phase inverters can be programmed to output 240V 60Hz for North American applications. Couple with an Autotransformer to do neutral forming for 120/240V split phase applications. We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz).
