60w uninterruptible power supply

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), with a 1kVA/600W capacity and line interactive design, provides battery backup for computers, servers, and office networks. It has a 220V/120V AC output voltage and is brand new, high quality, and inexpensive.

What is a 650V/390W uninterruptible power supply?

The 650V/390W uninterruptible power supply (UPS) features an Ecologic battery backup. It offers an automatic power saving mode and a multifunctional LCD panel, making it modern and convenient. This UPS uses a simulated sine wave output to protect workstations, network devices, and home entertainment equipment.

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What is a ups module with integrated battery?

UPS modules with integrated battery are particularly space-saving: the UPS module and battery are combined in one housing. It's just a case of connecting a power supply upstream. This product contains a battery with a limited shelf life that must be charged every few months.

How long does a power supply battery last?

It's just a case of connecting a power supply upstream. This product contains a battery with a limited shelf life that must be charged every few months. The product packaging indicates when the battery must be started up or recharged. The general shelf life can be found in the energy storage devices

area under “Latest startup”.
