

SolarInnovate Energy Solutions

Advanced photovoltaic panel manufacturer in Sydney Australia

Overview

Who is Australia's largest solar panel manufacturer?

We are Australia's largest solar panel manufacturer. Our focus is providing our customers with the top quality engineering solutions. We manufacture 300w-550w premium solar panels with industry leading reliability and performance warranty. Our high efficiency solar module comes with 25 year product and 25 year performance warranty.

What is Australian Centre for Advanced photovoltaics (ACAP)?

ACAP -The Australian Centre for Advanced Photovoltaics - is a dynamic, world-leading national centre where solar photovoltaic research institutions across Australia collaborate. ACAP's broad range of research work is driving Australia's international lead in solar technology and development, as global economies transition to renewable energy.

Is Australia a good place for solar PV Manufacturing?

The Silicon to Solar study examined the opportunity for Australia to establish viable, relevant, and timely local solar PV manufacturing. This report showcases a selection of case studies and snapshots revealing the incredible success of the first ten years of the ACAP program.

Is Phono Australia's top photovoltaic brand?

Phono has once again earned the esteemed EUPD Research award as Australia's top photovoltaic brand for the seventh consecutive year. Our dedication to innovation, dependability, and sustainability remains steadfast, establishing Phono as the preferred choice for high-quality solar solutions.

How many solar panels are there in Australia?

In 2013 there were more than 400 solar panel manufacturers approved for install in Australia. Today there are fewer than 100. Phono knows that we have a duty to our customers for the entirety of our solar panel's multi-decade

warranty. Our financial strength means that we know we will be around to honour our warranties.

Who are Astronergy solar panels?

Astronergy has established itself as a Tier 1 solar panel manufacturer of monocrystalline and polycrystalline PV modules. They specialise in cutting-edge research, development, and production of high-efficiency solar modules and have expanded production capacity from 25MW to 3000MW in step with the growing need to embrace clean energy.
