

**SolarInnovate Energy Solutions**

# **Base station equipment for container system**

## Overview

---

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

What is the scope of supply for containerized Mobile substations?

The scope of supply covers the complete assembly which may include:  
Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity.

What is included in a base platform configuration?

All base platform configurations include the same range of standard certified safety systems, including emergency lighting, smoke detection, carbon monoxide detection and fire extinguishing equipment. Within our core infrastructure lineup, we offer a range of products to meet general-purpose needs and operations.

What is a C4ISR container system?

Marshall provides deployable C4ISR container systems that meet key requirements for the modern warfighter, enabling multi-domain information acquisition and analysis while coordinating decision-making across the battlespace.

Why should you choose Marshall containers?

Built from Marshall's highly standardised design principles, our containers offer a wide range of size and equipment choices during initial configuration, while their modular design supports rapid reconfiguration and greatly reduces

the complexity of maintenance and repairs in the field.

What are Tamco standard containers?

Tamco standard containers utilize standard size land or marine transportation containers to meet different applications. TAMCO operates a Quality System in line with ISO9001 and ISO14001 In addition to in-house routine and QC test, all switchgear products are fully type tested and certified by CESI/KEMA.
