# Battery cabinet charging slow after upgrade

## Overview

---

Why is my lithium-ion battery charging slowly?

If you've identified that your lithium-ion battery is indeed charging slowly, there are several quick fixes you can try: Use a Compatible Charger: Always use a charger that is compatible with your device's specifications to ensure optimal power delivery.

Why is my iPhone charging slow after iOS 18/17 update?

**Battery Health:** If your iPhone's battery health is poor, the system may optimize charging speed after an update to protect the battery's lifespan. This can also lead to slower charging. **Hardware Issues:** Damaged charging cable, adapter, or charging port. **Part 2. How to Fix iPhone Charging Slowly After Update to iOS 18/17.**

Why is my Android charging so slow?

Some common symptoms of slow charging include: There are several reasons why your Android device may be charging slowly after an update. Some of the most common causes include: **Software issues:** Sometimes, updates can cause software bugs that affect your device's charging time.

Can a damaged charging cable slow down charging?

A damaged charging cable or an underpowered charger can often slow down charging. Therefore, you should check the cable for signs of damage and try a different cable to see if that resolves the issue. Similarly, check the charger's wattage to make sure it's powerful enough.

Why do lithium ion batteries take so long to charge?

Their ability to hold a charge diminishes as they age, leading to slower charging speeds. **Temperature Sensitivity:** Lithium-ion batteries are sensitive to temperature extremes. Charging in excessively hot or cold conditions can affect the chemical reactions within the battery, slowing down the charging

process.

Should I Turn Off optimized battery charging in iOS?

Turn Off Optimized Battery Charging Optimized Battery Charging in iOS is designed to extend the lifespan of your iPhone's battery by limiting its exposure to full charges. It studies your usage patterns and slows down charging above 80 percent until the time you need to use your iPhone. So, you might want to turn off Optimized Battery Charging.
