## Overview

---

Where can I buy and sell unused generator sets?

Buy and sell unused and used Generator Sets at IronPlanet. Whether looking to power your house after a bad storm, or supply power to an entire event; IronPlanet sells the Generator Set to fit your needs.

What is a natural gas generator set?

A natural gas generator set is a type of engine generator that offers cleaner and cost-effective power, with a typical power range from 20 kW to over 2,000 kW. These generators are widely used in commercial facilities, industrial sites, and backup applications due to their lower emissions and steady fuel supply.

What is a generator set?

A generator set, often referred to as a gen set, is a complete power solution that combines an engine generator with an alternator to produce electrical power. These units are crucial for providing backup power in emergencies and supporting continuous operations in remote locations or industrial settings.

What is a diesel generator set?

Diesel generator sets are reliable engine generators known for their durability and efficiency, commonly used in industries requiring continuous or emergency power supply.

What types of generators are available?

Our lineup includes: Diesel Generators: Robust and reliable, perfect for remote locations where fuel accessibility is a challenge. Natural Gas Generators: Eco-friendly options ideal for areas with existing natural gas infrastructure.

What is a Cummins generator set?

Cummins generator sets provide reliable power to communities and

businesses around the world and are the heart of fully integrated power systems to provide reliable power that is Always On.
