

**SolarInnovate Energy Solutions**

# **Camping power station factory in Turkey**

## Overview

---

Where are coal-fired power stations located in Turkey?

Coal-fired power stations in Turkey which burn hard coal are generally near the coast as almost all hard coal is imported, whereas those burning lignite are near coal fields. Coal-fired power stations which have been financed by international public investment institutions include the Afsin-Elbistan power complex.

Where is the EMBA Hunutlu power plant located?

The EMBA Hunutlu Power Plant is located in Adana Province, Yumurtalık District, Sugözü Village. EMBA is dedicated to building a modern power plant in Turkey with high performance and minimal pollution. For air pollutants control, specific measures will be implemented to reduce NOx, SOx and dust emission at the Hunutlu power plant.

Where is the Adana power plant located?

The Adana power plant is located in Adana Province, Yumurtalık District, Sugözü Village. It will be 8,000 hours operational in a year and will produce 11,5 billion kWh electricity power. This will be an important contribution for the energy demand in Turkey.
