# Can I buy a 5g mini base station

## Overview

---

What is a CableFree 5G small cell base station?

All of the the CableFree range of Small Cell products feature latest generation technology and upgradable features for future-proof networking and performance. CableFree 5G Small Cell Base Stations offer advanced features and “stand alone” capability for private 5G networks.

What is a 5G small cell gnodeb base station?

5G Small Cell gNodeB base stations from CableFree, part of the Emerald range of Base Station and core EPC products featuring advanced cellular technology. All of the the CableFree range of Small Cell products feature latest generation technology and upgradable features for future-proof networking and performance.

What is a 5G base station?

As part of a network’s wireless telephone system, a 5G base station is a fixed communication point that connects using a single or several antennas. It comprises a wireless receiver and a short-range transceiver with an antenna and analog-to-digital converters (ADCs) to convert radio frequency impulses to digital signals.

How much power does a 5G base station use?

Each nation has a different 5G strategy. For 5G, China uses 3.5GHz as the frequency. Then, a 5G base station resembles a 4G system, but it’s on a much larger scale. For sub-6GHz in 5G, let’s say you have a macro base station. The power levels at the antenna range from 40 watts, 80 watts or 100 watts.

What is small cell 4G & 5G LTE eNodeB?

Small Cell 4G & 5G LTE eNodeB & gNodeB from CableFree, part of the Emerald range of Base Station and core EPC products featuring advanced cellular technology. All of the the CableFree range of Small Cell products feature latest

generation technology and upgradable features for future-proof networking and performance.

Does CableFree offer a 5Ghz base station?

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for 4G/LTE operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE without requiring access to licensed spectrum. Band 46 covers 5150 – 5925MHz and uses TDD-LTE technology. Contact CableFree for details.
