Case study of illegal construction of communication base station energy management system

Overview

Why are power systems and communication systems increasingly coupled?

Therefore, power systems and communication systems are increasingly coupled. A power system supplies energy, and a communication system meets the demand for information exchange. A BS is the main intermediary between a communication network and a power network.

What is the access mechanism between EMCs and BSS?

To describe the access mechanism between the EMCs and the BSs, we introduce an $N_{bs} \times N_{mg}$ connection matrix A , where N_{mg} is the EMCs number and N_{bs} is the number of power towers which is also the number of candidate locations for base stations. It is not necessary for all power towers to be selected as communication power sharing towers.

Are solar cellular base stations transforming the telecommunication industry?

Improved Quality of Service and cost reduction are important issues affecting the telecommunication industry. Companies such as Airtel, Glo etc believe that the solar powered cellular base stations are capable of transforming the Nigerian communication industry due to their low cost, reliability, and environmental friendliness.

What is base station energy consumption index (ECI)?

Brief description about components of the base station Energy Consumption Index (ECI)—It represents the efficiency of BS power utilization. The lower value of ECI means greater EE as mentioned in Eq. 6 below. Its unit is J/bit.

How to make base station (BS) green and energy efficient?

This paper aims to consolidate the work carried out in making base station (BS) green and energy efficient by integrating renewable energy sources (RES). Clean and green technologies are mandatory for reduction of carbon footprint in future cellular networks.

Is communication reliability a CR-restricted coordinated operation strategy?

In our previous work, 21 we introduced the modeling of communication reliability (CR) to capture the mutual impacts of cyber-physical systems, and proposed a CR-restricted coordinated operation strategy in active distribution networks.

The Applicability of Macro and Micro Base Stations for 5G Base Station

Oct 14, 2022 · The construction of the 5G network in the communication system can potentially change future life and is one of the most cutting-edge engineering fields today. The 5G base ...

Design and implementation of a cloud-based energy monitoring system ...

Nov 20, 2024 · This paper presents the design and implementation of a cloud-based energy monitoring system specifically developed for 5G base stations, with a focus on optimizing ...

Energy-Efficient Base Station Deployment in Heterogeneous Communication

Aug 23, 2019 · Energy-Efficient Base Station Deployment in Heterogeneous Communication Network Published in: 2019 IEEE SmartWorld, Ubiquitous Intelligence & Computing, ...

Resource management in cellular base stations powered by ...

Jun 15, 2018 · Renewable energy sources are not only feasible for a stand-alone or off-grid BSs, but also feasible for on-grid BSs. This paper covers different aspects of optimization in cellular ...
