Central Asia Mine Double-Sided Solar Panels

Overview

Where are Yingli solar panels made?

Founded in 1998 and headquartered in Baoding, China, the firm is today one of the world's largest solar module manufacturers, with more than 60 million solar panels shipped to date. Yingli's bifacial modules, known as the TwinMax series, were launched last year, and are made using the company's special technology, known as Panda cells.

Do double-sided solar panels Excel efficiency and productivity?

Companies worldwide have launched double-sided modules in recent years, and one firm which says its bifacial panels excel efficiency and productivity is Chinese photovoltaic giant Yingli Solar.

How do solar panels work?

Like all solar panels, the sky-facing surface converts sunlight into power, but the underside can also absorb light that bounces off the pavement or rooftop.
