

SolarInnovate Energy Solutions

Chilean photovoltaic panel manufacturers

Overview

What is CVE's vision for solar energy in Chile?

In 2023, the deployment of photovoltaic parks reached 8.5 GW. The country is committed to increasing installed solar capacity to 22 GW by 2029. CVE's strategy is based on the production of decentralized renewable energies sold through short distribution channels. Chile is a key market for realizing this vision.

Does Chile have solar power?

Chile has exceptional solar potential and a favorable regulatory framework. In 2023, the deployment of photovoltaic parks reached 8.5 GW. The country is committed to increasing installed solar capacity to 22 GW by 2029. CVE's strategy is based on the production of decentralized renewable energies sold through short distribution channels.

Who is CVE Chile?

Since entering the Chilean market in 2016, CVE Chile has quickly established itself as a key player in the PMGD sector (a Spanish-language acronym that refers to generators under 9 MW connected to the power grid). Our subsidiary meets local energy needs while benefiting from a stabilized and regulated price for its PMGD projects.".

What is CVE Chile's battery storage technology?

CVE Chile has launched into battery storage technology. This development aims to optimize the use of photovoltaic production by shifting the electricity generated during the day to peak periods in the evening. This strategy is a response to our customers' fluctuating energy needs.
