Compact power station factory in Cyprus

Overview

Are there private power plants in Cyprus?

As a precondition to the accession of Cyprus to the European Union, the local market for electricity generation has been opened to private companies, but so far no private power plants have been built, although four licences have been granted by Cyprus Energy Regulatory Authority.

Is Mari a new power plant in Cyprus?

Mari is the first plant in Cyprus run by an independent power producer. Construction began in 2018 and has made slow progress (original completion was planned for 2021) . In 2021 buildings can be seen on the site. Its supply of LNG will come from the nearby LNG terminal scheduled to be completed in 2022.

When will Mari Power Station be fully operational?

The Power Station is anticipated to be in full operation by 2023 and is projected to be in line with the arrival of LNG on the island. It is an estimated investment of 200 million euros. Mari Power plant will use the latest technology in power generation.
