Companion 40ah power station in Kuala-Lumpur

Overview

What is a companion Rover lithium 40ah power station?

The Companion Rover Lithium 40Ah Power Station belied its diminutive size and packed plenty of power to keep electrical gear charged on the recent Simpson Desert adventure. Image credit: Justin Walker Companion's Rover Lithium 40Ah Power Station offers plenty of portable electric grunt to ensure ample power for your camping adventures.

How much power does a companion Rover 40 Power Station have?

The Companion Rover 40 Power Station is small in size but packs a decent punch, offering 40amp of lithium power in a package that weighs just 6.5kg, which is enough to keep my 47L myCOOLMAN fridge running for just under two full days without a charge. I can charge the power station back up via 240V mains, 12V or solar.

Is Rover lithium 40ah a good power station?

The Rover Lithium 40Ah Power Station's diminutive size belies its literal power and for those looking for a portable charging solution for their camping adventures, this unit is well worth a look. For those after more camp-side grunt, Companion's Rover 70Ah Power Station is another option, albeit with a seriously hefty jump in asking price.

Are there any lithium 40ah power stations available?

Sorry! We're unable to get our hands on any more of these. If you dream of staying off-grid for longer but still need to keep things charged, the Rover Lithium 40Ah Power Station from Companion is the trusty power solution to help turn that dream into reality.

Can a companion Rover power station Power a fridge/freezer?

Designed to provide power when going off-grid, the Companion Rover Lithium 40 Power Station is suitable for powering portable fridge/freezers and other

12V appliances. Its lightweight and compact design makes it a truly portable power source for your next camping or 4WD adventure.

How much power does a companion 200W solar charger produce?

When connecting the Companion 200W Solar Charger to my vehicle's battery, it could produce at best 10amp of output, which is fine by me. Companion claims a maximum output figure of 11.1amp per hour, so it's not far off the money.
