

## SolarInnovate Energy Solutions

# Creo curved energy storage products

## Overview

---

Why should you buy a Creo home?

Creo offers a highly energy efficient home making home running costs up to 90% less than other comparable new homes on the market; and a significant contribution to carbon reduction. Our homes require significantly lower levels of energy to heat, so low in fact most of our homes use up to 90% less energy than similar homes on the market.

What is a Creo hydrogen tank?

Creo's hydrogen tanks are specifically designed to store hydrogen and are certificated for use in the UK and Europe. The Creo hydrogen tanks are a cost effective method of short and long term pressurized hydrogen gas storage for both domestic and industrial use.

What is the Creo integrated hydrogen system?

The CREO integrated Hydrogen system has been developed to provide electrical power to a wide range of both Industrial and domestic applications worldwide. A complete scalable system able to supply electrical power from Solar, Wind and Grid power wherever it is needed.

Are Creo homes NHBC certified?

All Creo homes are constructed by experts to an exacting standard and come with an NHBC 10 year certificate and full after care support program. The CREO integrated Hydrogen system has been developed to provide electrical power to a wide range of both Industrial and domestic applications worldwide.
