Overview

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.

Who owns Senegal's power?

Senelec owns 15%, while West African Energy controls the remaining 85%. The project, located near Dakar, will use indigenous gas, potentially reducing Senegal's power rates. Turbines are supplied by General Electric, while engineering and construction are handled by Calik Enerji. Sendou - 125 MW.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

Will the 2022 Dakar have an alternative drive concept?

Eager to rise to this challenge, Audi has announced that it will be entering the 2022 Dakar with an alternative drive concept. - The Cyril Despres-Mike Horn duo and Guerlain Chicherit are among the ambitious competitors laying the groundwork for the transition in the 2021 Dakar.

Why is Dakar a leading role in the technological revolution?

Now, the Dakar has decided to play a leading role in this adventure by fostering ambitious initiatives and backing the technological revolution ushered in by makers, teams and crews eager to test their technological solutions against the most extreme conditions on Earth.

What is Senegal's largest gas-to-power plant?

The project, which is scheduled to begin construction in 2024, will be Senegal's largest gas-to-power plant, producing 360 MW from natural gas supplies. It will also run on light crude oil as an alternative fuel.
