# Djibouti s new energy storage appliances

## Overview

---

How can Djibouti lower its energy prices?

Djibouti can reduce energy prices by diversifying energy sources toward renewables. The free port of Djibouti finances its own power supply but is not entitled to sell its surplus energy. A regulator is needed to fairly and effectively regulate electricity prices in Djibouti.

What is the cost of electricity in Djibouti?

The cost of electricity in Djibouti is 23.4 US cents per kWh (in 2017). This is higher than the costs in Ethiopia, which were 4.7 and 4.4 US cents/kwh in 2016 and 2017, respectively.

Is AMEA power signing a long-term PPA with Djibouti?

The PPA being signed. Image: Amea Power. UAE-based renewable energy developer AMEA Power has signed a long-term PPA with the national utility of Djibouti for a 25MW solar PV plus battery storage unit. AMEA Power announced the signing of the power purchase agreement (PPA) with Electricité de Djibouti (EDD) today (29 August).

How does the electricity supply in Djibouti work?

Electricité de Djibouti (EDD) determines the feasibility and specifications of a connection to the electricity supply, as well as the connection fees. Following the inspection, the quote is transferred internally from the secretariat to the service manager, and then to the customer service department.
