Do shopping malls need uninterruptible power supply

Overview

The need to provide uninterrupted service to customers at rapidly expanding shopping malls, chain markets and retail sector networks requires the use of Uninterruptible Power Supply. Does a shopping mall need an ups?

A UPS alone will not provide sufficient back-up power to meet all the needs of a typical shopping mall and the most effective solution is likely to be a hybrid installation that combines the use of generators with an uninterruptible power supply. There are a number of possible configurations for such systems; each with its own attributes.

Should shopping malls provide back-up power?

However, without some means for shopping malls to provide back-up power when required, the customer experience might be a very different one, given the frequency of interruptions to the municipal supply, whether the result of storms, infrastructure failures, or planned outages.

Why do shopping malls need backup power generators?

Without electricity, retailers cannot trade. So, the overarching reason shopping malls need backup power generators is to provide tenants with a reliable source of electricity. With unplanned power outages and load shedding still impacting retail outlets across South Africa, having a backup power generator means business continuity; come what may.

Do I need an uninterruptible power supply?

An uninterruptible power supply (UPS), which is a battery that covers the 15-20 second delay between the time when the power goes out and the generator kicks in, is necessary for the generator. When you are ready for your new generator, call Jack Lehr Heating, Cooling & Electric at (888) 454-7365 or contact us online!.

Does your shopping centre need a backup power generator?

Let's face it: having a backup power generator is a competitive advantage for any shopping centre. If it's a choice between shopping at their favourite mall without power, or a competitor mall with backup generators, chances are a customer is going to go with option two.

Should a mall shut its doors during a power outage?

Whether a mall has to shut its doors during a power outage or not, being able to communicate with customers is pretty important. Backup power means a mall can communicate to customers that they are open and operational during outages. Air conditioning is such a relief for shoppers when visiting their favourite malls.
