

**SolarInnovate Energy Solutions**

# **EU Solar PV Modules**

## Overview

---

Markus Hoehner and Rajan Kalsotra, CEO and Senior Consultant at the Bonn-based EUPD Research, discuss the growth trajectory, challenges and opportunities within the EU solar PV market, focusing on policy support, pricing trends, module shipments and future projections. How many companies in Europe manufacture solar PV modules?

Today, at least 38 companies are active in Europe manufacturing the equipment and machinery that produces vital steps of the solar PV module supply chain, including cells, ingots, wafers, and polysilicon. EU Clean Industrial Deal: Opportunity for renewables and European manufacturing.

What does the new EU report 'solar production equipment' mean for solar PV?

The new report „Solar Production Equipment – Key players in the EU’s industrial ecosystem for solar PV” explores the European capacity to manufacture the equipment and machinery that produces at each stage of the solar module manufacturing process.

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you’ll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.

What is made in EU photovoltaics?

We are pleased to contribute to “Made in EU Photovoltaics,” a collaborative documentary project focused on the growth and innovation of the European solar PV industry. To meet our climate targets the world will need to reach an installed solar PV capacity of 50TW by 2040.

What is Solarpower Europe?

SolarPower Europe is the award-winning link between policymakers and the

solar PV value chain. Its mission is to ensure solar becomes Europe's leading energy source by 2030. ESMC is the organisation representing the interests of the European PV manufacturing industry. The Council relies o.

Does Europe have a solar supply chain?

SolarPower Europe has released a report mapping Europe's solar PV module production equipment capacity, identifying at least 38 companies involved in manufacturing key machinery for the solar supply chain, including cells, ingots, wafers, and polysilicon.
