# Energy Storage Power Smart Factory

## Overview

---

What is Tesla's first energy storage facility outside the US?

As Tesla's first energy storage facility outside the US, it represents a \$201.76M investment and a milestone in China. Adjacent to the Gigafactory Shanghai, which produces over 950,000 EVs annually, the Megafactory will be a key export hub. Megapack is a powerful battery.

What is the Tesla megafactory?

The Megafactory is the first of its kind that Tesla has built outside the United States. At its launch ceremony in May, Tesla signed a deal with Shanghai Lingang Economic Development (Group) Co Ltd, securing the first batch of orders for its Megapacks in China.

Why do smart energy systems need energy storage facilities?

Promoting renewable energy sources and their integration to the grid is one of the prime motives of smart energy systems. Key renewable energy sources compulsorily require energy storage facility due to their intermittent nature and uncertainty, and energy storage is a costly affair as of now.

How big is Tesla's China megafactory?

Tesla's 40-GWh Megafactory in Shanghai, covering 200,000 sqm, is set to commence operations in Q1 2025. The factory will mass-produce Megapacks, starting with 10,000 units annually (40 GWh). As Tesla's first energy storage facility outside the US, it represents a \$201.76M investment and a milestone in China.

How many gigawatts a year can a solar power plant produce?

The facility was built with an initial annual production capacity of 10,000 units, equal to around 40 gigawatt-hours of energy storage, according to the company.
