

## SolarInnovate Energy Solutions

# Energy storage battery module bom

## Overview

---

What is a battery management unit (BMU)?

Since the battery cells require a proper working and storage temperature, voltage range, current range for lifecycle and safety, the designer must monitor and protect the battery cell in the pack level. battery management unit (BMU) is a controller that monitors the voltage and temperature of each battery cell in the pack for a complete lifecycle.

What is a battery energy storage system?

Currently, the battery energy storage systems (BESS) play an important role in residential, commercial and industrial, grid energy storage, and management. A BESS has various high-voltage system structures. Commercial and industrial and grid BESS contain several racks that each contain packs in stack. Residential BESS only contains packs.

What is the difference between a battery module and a pack?

Note: Batteries are sometimes called Modules and Packs. The main difference is that a Pack contains housing and extra protection. In the Energy Storage System Field, Battery Pack and Battery Module usually refer to the same thing.

What is a battery energy storage system (BESS) e-book?

This document e-book aims to give an overview of the full process to specify, select, manufacture, test, ship and install a Battery Energy Storage System (BESS). The content listed in this document comes from Sinovoltaics' own BESS project experience and industry best practices.

What chemistry is used in battery energy storage system?

Do a quick research. •Battery cell chemistry:LFP (Lithium iron phosphate – chemical formula  $\text{LiFePO}_4$ ) is the main chemistry used in the Battery Energy Storage System industry due to lower cost and increased safety.

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.
