

## SolarInnovate Energy Solutions

# Energy storage inverter accessories

## Overview

---

Common inverter accessories include remote control panels, monitoring systems, communication interfaces, and battery cables. What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

Which batteries are used in our inverters?

For batteries, we only use Class A LiFePO<sub>4</sub> batteries from China's top five brands, using BYD automotive-grade smart BMS technology. Our inverters' core components are adopted with international brands. Such as, IGBT is from INFINEON, and MOSFET is from TOSHIBA.

What is BMS + industrial and commercial energy storage inverter?

The complete set of energy control solutions of "BMS + industrial and commercial energy storage inverter" is suitable for industrial parks, backup power, photovoltaic storage, wind storage and other application scenarios to ensure the safety of industrial and commercial battery systems. Safe operation and system performance optimization.

Who is Tu Energy Storage Technology (Shanghai)?

Safe operation and system performance optimization. TU Energy Storage Technology (Shanghai) Co., Ltd., founded in 2017, is a high-tech enterprise specializing in the research and development, production and sales of energy storage battery management systems (BMS) and photovoltaic inverters.

What are the advantages of a three-phase hybrid inverter?

Product Advantage: The main indexes of three-phase hybrid inverters are in the leading position in the industry; the cost, performance and main technical indexes of industrial frequency inverters, off-grid hybrid inverters (high-

frequency machines) and lithium batteries have significant advantages.

Why should you choose dauntu energy storage?

There are many stringent requirements on the security and reliability of BMS, and dauntu energy storage has made full preparations. From core chip selection to system-level architecture, we guarantee the safety and reliability of battery products in an all-round and real-time manner.
