Overview

Is the Ethiopian telecom industry under-covered?

Regarding research, the Ethiopian telecom industry is under-covered. However, as discussed earlier, Ethiopia continues to suffer substantial negative consequences from having one of the worst telecommunications services in the world.

Why does Ethiopia need massive telecom infrastructure investment?

Therefore, Ethiopia requires massive telecom infrastructure investment due to the existing large-scale limits of network coverage, middle-mile and first-mile connectivity. Such a substantial infrastructure and funding gap requires effort from all stakeholders.

Does Ethio Telecom have 2G coverage in Addis Ababa?

The TEP project promised to increase 2G coverage from 64% to 90%, improve 3G network coverage in rural areas and introduce LTE in Addis Ababa (Wall Street Journal, 2014). However, currently, Ethio Telecom has around 85 percent 2G coverage, 66 percent with 3G, and 4 percent with 4G (The World Bank, 2019).

Can Ethiopian telecom policies & strategies be based on a concrete broadband roadmap?

However, with an additional detailed analysis, this work may be used as a foundation in drawing the Ethiopian telecom policies, strategies, and action-oriented concrete broadband roadmap.

Why is the Ethiopian Telecommunication industry underperforming?

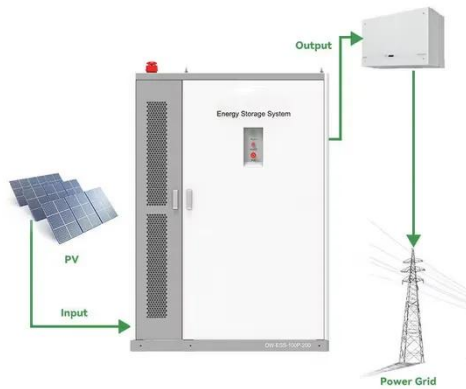

Even though enormous literatures are supporting the significant positive impact of ICT on a country's economy, there is almost no published research work seeking out why the Ethiopian telecommunication industry is underperforming. Regarding research, the Ethiopian telecom industry is under-

covered.

Who supervises Telecommunications in Ethiopia?

After the 1996 proclamation, Ethiopian telecom operator used to be supervised by the Ministry of Transport and Communications, later called the Ministry of Development Infrastructures (MDI). The Ministry oversees energy, transportation, and postal services besides telecommunications (Federal Democratic Republic of Ethiopia, 2001).
