Future Communications Eliminates Base Stations

Overview

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

Will Future Industries gain more support amid rising geopolitical tensions?

The above fields will likely gain greater support amid rising geopolitical tensions," said Luo Zhiheng, chief economist of Guangzhou-based Yuekai Securities. "Future industries may enter a new phase as detailed policies or action plans are expected from various ministries and commissions concerned," Luo said.

Will 5G NR be the foundation for future wireless communication?

The book also examines challenges related to spectrum allocation and network densification. X. You et al. (2021) It concludes that 5G NR will be the foundation for future wireless communication but requires careful standardization and optimization.
