Georgia photovoltaic panels

Overview

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Does Georgia have a solar market?

National Solar Capacity Ranking: 7th Data Current Through: Q1 2025
Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort.

How much does a 6 kW solar system cost in Georgia?

A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.

Which company should I choose for solar in Georgia?

Here are the top companies we recommend for solar in Georgia: Go Solar
