What is photovoltaic curtain wall?

Photovoltaic Curtain Wall generates energy in the building implementing solar control by filtering effect, avoiding infrared and UV irradiation to the interior.

What are aluminum curtain walls?

The aluminum systems are not only easy to transport but also straightforward to manufacture. Curtain walls —also known as glass façades and exterior glazing systems —convert previously unused spaces into energy assets, enhancing both aesthetics and functionality.

What is a curtain wall?

Curtain walling refers to a non-structural cladding system made from fabricated aluminum, commonly used on the outer walls of tall multi-storey buildings. This lightweight material offers ease of installation and can be customized to be glazed, opaque, or equipped with infill panels.

What is composite curtain wall system?

Product Description: Composite Curtain Wall system is an advanced aluminum alloy curtain wall system that is designed to provide superior durability, long-term performance, and excellent aesthetic appeal. This system is made of the highest quality aluminum alloy panels, with an integrated powder coating finish, and a 5-year warranty.
