

SolarInnovate Energy Solutions

High quality voltage breaker in Turkey

Overview

Are Astor circuit breakers used in HV energy systems?

Astor brand 170 kV, 4000 A, 50 kA line and transformer circuit breakers, whose production and type tests were successfully completed in 2020, started to take their place in HV Energy Systems. ASTOR circuit breakers which were manufactured for the first time in Turkey by 2020, will be utilized in the power transmission.

Will Astor circuit breakers be used in the power transmission?

ASTOR circuit breakers which were manufactured for the first time in Turkey by 2020, will be utilized in the power transmission. With this success, Turkey will become a foreign-independent country and we are proud of this honor as ASTOR family.

Are tea circuit breakers ready for power transmission?

Currently, the managers and technical team of TEİAŞ (Turkish Electricity Transmission Corporation) are checking the prototype of these circuit breakers and are about to finish the inspections according to the specifications. Subsequently, the circuit breakers will be put into use in all TEİAŞ substations for power transmission.
