Why is solar important in Vietnam?

WHY VIETNAM?

Solar is a significant part of Vietnam's renewable energy strategy. State-owned utilities are investing in utility scale floating solar projects, the government is offering generous incentives for rooftop solar and large energy users are adopting onsite solar at an increasing rate.

Is Viet Nam a solar country?

In general, Viet Nam can be considered as a country with high solar energy potential. The solar resources are comparable to countries like Italy, Spain, and California or - staying in the region - China or Thailand.

Will solar power become the dominant energy source in Vietnam in 2050?

Solar power will become the dominant energy source in Vietnam's energy mix in 2050 when the Vietnamese economy is set to be decarbonised. Reserve your spot today and be part of shaping tomorrow's energy landscape at Solar & Storage Live Vietnam.

What is solar & storage live Vietnam?

At Solar & Storage Live Vietnam, we'll explore: MOUNTING, ASSEMBLY & RACKING Getting to grips with the major issues affecting large-scale solar project developers and their partners. Driving the proliferation of commercial & industrial rooftop solar projects across Vietnam, greening operations and reducing operating costs.

How big is the solar PV market in Vietnam?

The Vietnamese solar PV market is currently very small with only around 4.5 MWp installed capacity at the end of 2014. Around 80% of that capacity was deployed off- and 20% on-grid. For off-grid uses, applications can be divided

into two main categories.

What are the main off-grid applications in Viet Nam?

Following the available data, roughly 60-70% of the off-grid installed capacity in Viet Nam is dominated by smaller applications such as Solar Home Systems (SHS), small base transceiver stations for telecommunications (BTS), solar public lighting systems and likewise applications.
