How many energy storage power stations are there in Honduras

Overview

How many power plants are in Honduras?

Honduras has 40 utility-scale power plants in operation, with a total capacity of 2164.9 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

How much electricity does Honduran have?

Honduran electrification is low and uneven relative to other countries in Latin America. The World Bank estimates that only about 36 percent of the Honduran population had access to electricity (20 percent of the rural population) in 1987. The country's total capacity in 1992 was 575 megawatts (MW), with 2,000 megawatt-hours produced.

Where is the electricity system concentrated in Honduras?

The national electricity system is concentrated in the western part of Honduras. In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity, with the sparsely populated eastern part remaining mainly beyond economic line-extension distances.
