# **How much is the price of photovoltaic panels in Nuku alofa Village**

## Overview

---

How much does utility-scale solar cost in Japan?

In 2022, utility-scale solar in Japan cost approximately 1,905 U.S. dollars per kilowatt. The drop in solar prices is fueling the immense growth seen in the global photovoltaic industry. Get notified via email when this statistic is updated.

How efficient is a residential PV system in 2024?

The representative residential PV system (RPV) for 2024 has a rating of 8 kW dc (the sum of the system's module ratings). Each module has an area (with frame) of 1.9 m<sup>2</sup> and a rated power of 400 watts, corresponding to an efficiency of 21.1%.

How much power does a monofacial solar module produce?

Each module has an area (with frame) of 1.9 m<sup>2</sup> and a rated power of 400 watts, corresponding to an efficiency of 21.1%. The monofacial modules were assembled in the United States in a plant producing 1.5 GW dc per year, using n-type crystalline silicon solar cells produced in Southeast Asia.

How efficient are bifacial solar modules?

Each module has an area (with frame) of 2.57 m<sup>2</sup> and a rated power of 530 watts, corresponding to an efficiency of 20.6%. The bifacial modules were produced in Southeast Asia in a plant producing 1.5 GW dc per year, using crystalline silicon solar cells also produced in Southeast Asia. In 2024Q1, these modules were not subject to import tariffs.

Are nuuko products durable?

The durability of Nuuko products undergoes rigorous internal testing in Nuuko laboratories, and is regularly submitted to the TÜV Laboratories for testing by world-leading independent testing organizations.
