# **Is there an energy storage power station in St George**

## Overview

---

Does St George have electricity?

St. George supplies the majority of its residents with power, but most residents and businesses south of the Virgin River receive their electricity from Dixie Power, a separate energy cooperative. Both utilities are forecasting fast-paced increases in demand.

Is St George a good place for solar energy?

With the city planning on using less coal and more renewable energy, a major focus is the expansion of solar energy in and around St. George, according to Mangum. In the newly released Utah Energy and Innovation Plan, the sunny southwest corner of the state is promoted as a prime spot for continued solar development.

How much electricity does St George hydro generate?

The water that naturally flows from the river turns the turbines in the dam at St. George. Brunswick. The hydro facility was extensively redeveloped in 2002-2004, and has a current annual generating capacity of approximately 45,000 MWhr of electricity generated from 2 turbines having a combined maximum capacity of 15 MW.

How much does St George energy cost?

The base charge for everyone is \$18.65, according to the city's website, and covers "the cost of doing business," which covers repairs and staff expenses within the St. George Energy Department, according to Mangum.

How many power meters are there in St George?

In the past 10 years, more than 5,000 power meters have been added to the St. George system, rising from 27,410 meters in 2012 to 32,757 meters this year, roughly a 19.5% increase.

Will solar go down in St George?

“Solar is going to come on at a certain time and it's going to go down at a certain time,” Mangum said, suggesting the city will also need to have other sources in its mix. Mangum says the current makeup of rooftop solar in St. George can provide about four megawatts of energy during peak hours.
