What is a 48V inverter?

The 48V inverter, the electronic component that drives the 48V eMotor (electric motor), is able to be integrated on all architectures beyond P0 (alternator position) meaning between the engine and the gearbox or in the gearbox or on the vehicle rear axle.

What are the benefits of a 48V inverter?

When associated with an internal combustion engine (ICE), for hybrid applications, the 48V hybridization can provide up to 15% fuel economy benefits on WLTP cycle compared with a conventional stop-start system. 48V can also be used for eMobility (Small mobility market) for light electric 2-, 3- or 4-wheelers.
