

**SolarInnovate Energy Solutions**

# **Malawi Wind and Solar Energy Storage Project**

## Overview

---

IPP JCM Power and the US Trade and Development Agency (USTDA) are procuring a feasibility study for a project in Malawi combining 50MW wind power generation and a 100MWh BESS. What are some solar energy developments in Malawi?

In Malawi, solar energy developments are helping local communities maintain sustainable energy. For instance, Bwengu Projects Malawi provides teachers in high-needs schools with solar-powered LED projectors in Bwengu, the northern countryside of Malawi.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

What is the Malawi Bess project?

The Malawi BESS project will guide the scale-up of BESS projects in the Consortium's participating countries. To alleviate energy poverty by 2030 and save a gigaton of CO<sub>2</sub> in low and middle-income countries, it is estimated that 90 GW of BESS must be developed to support the required 400 GW of renewable energy.

Can Malawi achieve universal electricity access by 2030?

We look forward to continuing our partnership with the Government of Malawi to support the country's ambition to achieve universal electricity access by 2030 as we pursue the goals of Mission 300: connecting 300 million Africans to electricity by 2030 at unprecedented scale and speed."

How can collaboration improve the resilience of Malawi's grid?

By enhancing the stability and resilience of Malawi's grid, it demonstrates the

power of collaboration in advancing energy access, reducing emissions, and supporting livelihoods.

Is Malawi a proof point for geapp's Bess project?

By breaking ground for this BESS project (and its subsequent completion expected in 2025), Malawi is an important proof point for the BESS Consortium launched by GEAPP at COP28 to secure 5 gigawatts (GW) of BESS commitments in low and middle income countries (LMICs) by the end of 2024.

## Malawi Wind and Solar Energy Storage Project

---

### Comprehensive onshore wind energy assessment in Malawi

...

Apr 1, 2024 · Furthermore, these proposed wind projects can markedly reduce CO 2 emissions, positioning Malawi in tandem with global sustainability aspirations. Overall, this study provides ...

### GEAPP, Government of Malawi launch the construction of 20

...

Nov 28, 2024 · The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually,
