Modular UPS uninterruptible power supply equipment in Cordoba Argentina

Overview

What is uninterruptible power supply?

An uninterruptible power supply or UPS serves as a temporary power source and protection device for electrical equipment in the case of power fluctuations or interruptions. We offer customers a full range of UPS options for computers, servers, data centers, and other vital electrical systems.

What is a Delta ups?

With its wide range of Uninterruptible Power Supplies (UPS), Delta offers a competitive edge to businesses in need of first-rate power solutions. Delta UPSs are designed to ensure that companies can protect their mission critical applications by maintaining a steady flow of energy under adverse circumstances.

What is the DPA 250 S4 online double conversion modular uninterruptible power supply?

The DPA 250 S4 online double conversion modular uninterruptible power supply represents the latest technological innovation. This modular UPS is based on decentralized parallel architecture (DPA™), where every UPS module is practically its own UPS, having all the essential functional units needed for independent operation.

What is a three-phase online modular uninterruptible power supply system?

Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA. Delta's UPSs are some of the most advanced in the industry, renowned for their innovation, reliability, and efficiency.

Why should a business use a Delta ups?

Delta UPSs are known for efficiency and for saving not just energy, but money that would be wasted by less advanced devices that require too much power.

The growth of a business should never be at risk of limitation or delay due to avoidable technical restrictions of existing power hardware.
