# **Motor circuit breaker factory in Vancouver**

## Overview

---

What is a motor protection circuit breaker?

A motor protection circuit-breaker is an electric switching device that turns power off as soon as an overheating danger is suspected. Magnetic-only circuit breakers switch off when a short-circuit arises in the motor, or somewhere in its supplying and controlling chain.

What brands of circuit breakers are in stock?

Circuit Breakers - Huge IN-STOCK Inventory of over 100,000+ products, including Eaton / Cutler Hammer / Westinghouse, Siemens / ITE, Federal Pioneer, General Electric, Square D / Schneider Molded Case Circuit Breakers.

Who is Beaver electrical?

Beaver Electrical offers sales, service, repair, testing & rewinds for industrial motors, transformers & equipment. Trust western Canada's electrical experts.

Who is RSTM Breakers & controls?

RS™ Breakers & Controls is an Original Equipment Supplier offering the largest inventory of new, reconditioned and used-tested electrical equipment in Canada.

When does a thermal-magnetic circuit breaker switch off?

Thermal-magnetic circuit breakers switch off in case of a short-circuit, and also when the motor is mechanically overloaded, or when the supplying line is electrically overloaded (for instance in case one of the three phases is accidentally disconnected). Either by a thermal-magnetic circuit breaker.
