

**SolarInnovate Energy Solutions**

# **Namibia Energy Storage Support Project**

## Overview

---

Why is a battery storage facility important in Namibia?

The battery storage facility is expected to be crucial in improving system stability, lowering dependency on energy imports, easing the smooth integration of large-scale renewable energy sources into Namibia's power grid, and more effectively controlling demand peaks.

How can Namibia improve its electrical infrastructure?

A significant \$138.5 million investment package to improve Namibia's electrical infrastructure has been certified by the World Bank. The package places special emphasis on the integration of renewable energy through reinforced transmission lines and the installation of a second utility-scale battery storage facility.

What is Namibia's first energy project funded by the World Bank?

The package places special emphasis on the integration of renewable energy through reinforced transmission lines and the installation of a second utility-scale battery storage facility. Under the leadership of NamPower, the national power provider, this historic endeavor represents the first energy project in Namibia to be funded by the World Bank.

How will NamPower change Namibia's energy environment?

With financing from the World Bank, NamPower's ambitious project is expected to drastically change Namibia's energy environment by lowering outages, promoting load growth, and creating new avenues for power trading within the Southern African Power Pool.

What does the World Bank do for Namibia?

Guiding young minds, she believes in laying down roots of integrity, passion, and resilience. World Bank grants \$138.5M to boost Namibia's power grid and renewable energy integration. A landmark step for energy sustainability.

What grants will be used to fund the battery storage facility?

Grants from the Green Climate Fund and the International Bank for Reconstruction and Development (IBRD) Fund for Innovative Global Public Goods Solutions will be used to fund the battery storage facility.
