New House Solar System

Overview

Does your new home need a rooftop solar system?

Once you are setup, SunPower will take it from there. In 2020, California became the first state to require net zero energy construction on all new homes, including a mandate that all new homes include a rooftop solar component. The SunPower New Homes Department is here to help you understand how this mandate affects new home buyers like you.

What is the future of solar energy for homes?

The future of solar energy for homes looks promising, with continuous advancements in technology and integration with smart home systems making it more efficient and accessible. New developments in solar panel efficiency are allowing them to generate more power with less space.

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Does SunPower have a new home?

SunPower's latest achievement revolves around new home construction, recently topping our 100,000th home with a fresh set of solar panels. What happens once you sign the dotted line?

.

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among

competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.

Can a solar power system run a home 24/7?

Yes, a well-designed solar power system can run a home 24/7, but it requires battery storage and smart energy management. Since solar panels generate electricity only during the day, a reliable backup solution is necessary for nighttime and cloudy days.
