

**SolarInnovate Energy Solutions**

# **Niue Energy Storage Power Station Agent**

## Overview

---

How did New Zealand support Niue's battery energy storage system?

In addition to Australia's support, the New Zealand Government contributed \$2.5 million to relocate and restore Niue's Battery Energy Storage System (BESS). This funding has allowed the Ministry to repair the grid control system, procure necessary fuel tanks, and install cabling and connections.

What are the energy losses of Niue Power System?

13.5.1 Electricity supply losses A study of the Niue power system energy losses conducted by KEMA in 2012 quantified the losses into two categories: station losses, which were categorised as efficiency of generating units and power plant auxiliary loads and distribution station losses.

When is Niue's New Power Station launching?

The Ministry of Infrastructure celebrated the successful launch of Niue's New Power Station on the 7th November 2024. The launch marks a critical milestone in Niue's journey to strengthen and modernize its energy infrastructure.

What is the Niue strategic energy road map?

lands and communities to markets. This Niue Strategic Energy Road Map 2015–2025 is government's effort, at the national level, to work with its national and regional partners and the global community to unlock the development potential of Niue and to contribute to addressing.

How much energy does Niue use?

and government (20%) respectively. In addition to this, Niue has unbilled consumption for street lighting and water pumping. The efficiency of fuel use for power generation has shown a decrease from 4.29 kWh/litre in 2009 to 3.77 kWh/litre in 2014. Energy consumption in the transport sector has steadily risen by 4% annual growth.

## How is Niuean PowerSmart generating electricity?

Working with Ministry of Foreign Affairs and Trade (MFAT) and the Niuean Government, Vector PowerSmart designed and built a sustainable generation plant and energy management system for the island, using new solar and battery technology. The 600kW of solar technology has produced 320,000kWh of electricity in the six months since 1 January 2019.
