

## SolarInnovate Energy Solutions

# Nordic launch of power base station

## Overview

---

How is the Nordic power system changing?

In the report we present our perspective on the overall trajectory of the Nordic power system, which is undergoing significant changes with the expansion of renewables, electrification and new industrial demand. This year's report reaffirms the Nordic TSOs commitment to do what we can to enable a successful transition.

Why do Nordic countries have a strong energy system?

The Nordic countries have a unique and long-standing cooperation in the energy field, and our power system is among one of the most integrated in the world. The sum of our different energy resources and comparative advantages constitutes a diversified and resilient Nordic system and makes our system stronger.

What is the biggest energy storage investment in the Nordics?

Among her comments at the ceremony, Pourmokhtari said: "It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. "Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production.".

Who oversees the connection to the Nordic power grid?

The connection to the grid was overseen at the time by the Swedish minister for climate and the environment, Romina Pourmokhtari. Among her comments at the ceremony, Pourmokhtari said: "It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid.

Does the Nordic power system need a firm connection?

The Nordic power system is already highly utilised, and in many areas, it is not

possible to connect new loads or generation with a firm connection without having to reinforce the grid. The grid constraints that hinder firm connection are strongly dependent on local conditions and vary from case to case.

Are the Nordics ready for a net zero energy transition?

The Nordics have taken an early lead in the energy transition race. With a heavy focus on renewable power and abundant system flexibility, the region is arguably decades ahead of other markets and will play a pivotal role in wider European net zero ambitions.
