

SolarInnovate Energy Solutions

Nordic rooftop photovoltaic inverter manufacturer

Overview

Which PV inverter is suitable for residential developers in Norway?

For residential developers in Norway, the single phase SG2.50RS PV inverter is available, with easy set-up and installation and smooth operation monitoring via the Sungrow WiNet-S system. Plug-and-play set-up is simple and efficient and supports remote operation and maintenance functions, including upgrading and parameter setting.

What types of inverters are available in Sweden?

Residential installers and independent service companies in Sweden can access 3-phase 600/1000V inverter options including the three-phase (RT) and single-phase (RS) Series string inverters, hybrids and battery systems.

Are Sungrow inverters suitable for residential rooftops?

Sungrow also offers one of the broadest portfolios of residential inverters currently on the market, ranging from 2kW to 20kW, suitable for mainstream residential rooftops in a number of countries.

Does Sungrow sell inverters?

Sungrow has announced it is to make its award-winning portfolio of inverters available in the Swedish, Norwegian and Danish markets, with a knowledgeable local team and plans to implement on-the-ground support covering project management, commissioning and operations and maintenance.

Which MV stations are available for string inverters?

Three new MV stations for string inverters will be available across Norway, Denmark and Sweden from Q3 2022, the MVS3200/4480-LV, MVS6400-LV and MVS8960-LV combining high reliability with low-cost, easy set-up and installation, providing turnkey solar solutions for utility-scale energy supply.
