

**SolarInnovate Energy Solutions**

# **North African container solar panel manufacturer**

## Overview

---

Are our energy solutions made in Africa for Africa?

We pride ourselves that our energy solutions are made in Africa for Africa.”  
Pre-installed 20ft solar container with all equipment for 33kWp of PV and up to 96kWh battery storage. Innovation in containerised electrification.

What makes our containerised solar power generation units special?

“What makes our containerised solar power generation units special,” says Tobias, “is our use of international quality engineering and components, while still producing local content that allows us to offer a price advantage and local support. We pride ourselves that our energy solutions are made in Africa for Africa.”.

Who are VAC solar?

VAC Solar specialise in the design, development and construction of containerised solar PV plants. The deployment of containerised PV plants is a fast and convenient method of deploying a new system in remote locations where brick and mortar buildings are not available.

What is sustainsolar – a containerised solar power solution?

Sustainable Power Generation (Pty) Ltd recently introduced its new containerised solar power solution – SustainSolar – for the African market. The South African-based clean Developing economies face numerous challenges regarding reliable electricity supply, especially in rural areas, which require unique, inventive responses.

What is a container energy storage system?

A Container Energy Storage System (ESS) is a modular, scalable solution for storing electrical energy. It typically consists of batteries housed in a shipping container, which makes it easy to transport and deploy. These systems can be used for various applications such as grid support, renewable energy

integration, and backup power.

What is a containerised PV plant?

The deployment of containerised PV plants is a fast and convenient method of deploying a new system in remote locations where brick and mortar buildings are not available. These plants can be built and commissioned off site and reduces the time from order placement to energy production significantly.
