

## SolarInnovate Energy Solutions

# Outdoor power supply inverter

## Overview

---

What is a solar inverter used for?

This Inverter is very suitable for solar power systems, wind power generation systems, wind and solar hybrid generation systems. The inverter can supply AC power to all kinds of electric equipment, air conditioners, electric motors, refrigerators, fluorescent lights, televisions, electric fans and other industrial power supply.

What size inverter do I Need?

As we demonstrated in our list, there are inverters of all size, from 1.3kW to 12kW. For a small off-grid cabin without AC, we recommend 1kW to 3.5kW. For an off-grid house with a single AC unit, 5kW will do a great job. To power a large off-grid house with all the regular appliances and an AC, you'll need around 10kW of power.

Should you buy a power camping inverter?

In reviews, one of the things that keep coming up is that this power camping inverter is well built, and holds together well. When going on a wild-thing vacation, quality is important. You don't want your power source falling apart in the desert or out in the woods.

What is the best solar inverter?

We've selected the EasySolar 12/1600, an all-in-one inverter that includes an MPPT solar charge controller and a pure sine wave inverter. All you need to do is plug in your batteries and solar panels. The batteries can be charged by the solar panels or an external AC source (generator, utility grid) as a backup. Max. PV input power: 2000W.

What is a power inverter?

The phrase "power inverter" sounds kind of sci-fi at first. Almost like something you'd hear on a television show, or in the movies—"I can't

transport the rest of the crew until I've had a chance to fix the power inverter, Captain". But, in reality, it's a tool, not unlike a power drill or a screwdriver.

What is the most powerful off-grid inverter?

The SA-12K is the most powerful off-grid inverter developed by SolArk. With 9kW, it has no problem to power a fully off-grid house. It features 2 MPPT solar charge controllers that allow up to 13kW of solar panels. This is more than enough to cover the daily needs of the average American house.
