# **Panama Colon Island Energy Storage Project**

## Overview

---

The project, AES Colón, consists of a 380 MW gas-fired power plant and an onshore LNG import and regasification terminal with an 180,000 cubic meter storage tank. How will POSCO E&C's Colon power plant work?

POSCO E&C will also construct a gas terminal with a storage capacity of 180,000 m<sup>3</sup>. Power produced from the Colon combined cycle power plant can be supplied to around 15 million households simultaneously, which will ensure a stable supply to the industrial complex near the Panama Canal and Colon area.

What is the largest power plant in Panama?

The power generation capacity of Colon CCPP—380MW—is the largest in Panama. The plant is located in Colon, which lies near the Atlantic entrance to the Panama Canal and is about 60km north of Panama City, the capital of the country. POSCO E&C will also construct a gas terminal with a storage capacity of 180,000 m<sup>3</sup>.

Where is AES colon power station?

AES Colón power station (Termoeléctrica Colón) is an operating power station of at least 381-megawatts (MW) in Isla Telfers, Colón, Panama. It is also known as Costa Norte Gas. The map below shows the exact location of the power station. Your browser is not compatible with Google Maps v3. Unit-level coordinates (WGS 84):.

How will POSCO E&C impact Latin America?

Power produced from the Colon combined cycle power plant can be supplied to around 15 million households simultaneously, which will ensure a stable supply to the industrial complex near the Panama Canal and Colon area. Despite weak global economic conditions, POSCO E&C achieves total value of \$5.6 billion in Latin America within 10 years
