# Paramaribo base station communication query

## Overview

---

Which Maritime Authority of Suriname has issued a notice to Mariners?

The Maritime Authority of Suriname has issued the following Notice to Mariners: "From June 7th till August 12th, 2019, the survey vessel HARRIER EXPLORER will conduct a seismic survey at one hundred and fifty nautical miles (150 NM) off the coast of Suriname.

What is a base station?

Base stations also allow control over the slot map by reserving space for AtoNs using FATDMA to broadcast into. Base stations can offer many different connectors, allowing connection to many different display systems, including PCs, chart displays, or wireless enabled devices.

How to find a base station?

Base station location in urban areas is best determined by doing round trips of city blocks. At more rural locations you should do larger sweeps to save time. You will get the best result on flat ground. Ensure that you have a sufficiently good connection to the base station as well as a GPS connection.

Is there a unified signal processing framework for a ship-based station?

Through the establishment of a channel model that captures the complexities of the maritime environment and the analysis of the dynamic behavior of the ship-based station, this article introduces a unified signal processing framework for this ISAC system.

How can I see the location of a mapped base station?

The map opens from left side main menu. In the maps tab you can see the location of already mapped base stations. The application will automatically only show the base stations of the current network being used (LTE in the picture). The location of base stations can also be viewed from the Cellmapper webmap.
