

**SolarInnovate Energy Solutions**

# **Paris Uninterruptible Power Supply Supply**

## Overview

---

The cRadia Paris Interactive UPS 3020VA is an uninterruptible power supply (UPS) that provides efficient protection for electronic equipment against voltage variations and spikes in electrical current. Where can I buy UPS - uninterruptible power supplies?

Find a huge range of UPS - Uninterruptible Power Supplies at Farnell France. We stock a large selection of UPS - Uninterruptible Power Supplies, including new and most popular products from the world's top manufacturers including: Apc, Schneider Electric, Phoenix Contact, Siemens & Ea Elektro-automatik.

What is an Uninterrupted Power Supply (UPS)?

An Uninterrupted Power Supply (UPS), often referred to as UPS, is a necessary electrical device in urban households, commercial establishments, factories, and industries today. It backs up power and provides uninterrupted supply when the power unexpectedly shuts down from the mains.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

What makes Puls a reliable power supply?

Efficient, compact and reliable DC-UPS from PULS ensure highest system

availability. Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an uninterrupted power supply for periods measured in seconds.

What is a power ups & how does it work?

A ups is a device used to generate current. It replaces a faulty or missing power supply. It is a safe, uninterrupted backup power solution that provides electrical protection for networks, data centers, critical systems and industrial manufacturing processes.
