

SolarInnovate Energy Solutions

Photovoltaic 3kw home inverter

Overview

High efficiency hybrid 3000W PV inverter with 3000W rated power, wide DC input voltage range of 360-500 volt and default 1-phase AC output of 208/220/230/240V, higher efficiency and more stable performance. 3 kW hybrid inverter combines the functionality of a traditional solar inverter with that of a battery storage system, enabling the integration of solar energy generation with energy storage capabilities. What is a 3KW hybrid solar inverter?

This 3kW Hybrid all-in-one, off grid, PV inverter is a combination of 145V 80A MPPT solar charge controller, solar inverter, 40A battery charger and AC auto-transfer switch with a peak DC to AC conversion efficiency of 93%. Inverter Voltage Needed?

What is a 4KW solar inverter?

What Is A 4kw Solar Inverter, And How Does It Benefit You?

A solar inverter is an eco-friendly device that converts the direct current (DC) electricity generated by your solar panels into alternating current (AC) electricity. This AC electricity can then be used to power your home or business.

Will I be charged if I buy a 3000W solar inverter?

You won't be charged until the item ships. A revolutionary all-in-one solar inverter: the 3000W solar inverter has a built-in 60A MPPT charge controller and operates from 24V to 110V or 120V AC. With an efficiency of up to 99.9%, the solar charge module uses the most recent optimized MPPT tracking technology.

What is a 3KW inverter generator?

Our 3kW inverter generator delivers a pure sine wave and is suitable for powering sensitive equipment such as televisions, stereos, computers, smartphones, fridges, lights, and air conditioners. It features a 5.8-litre tank, providing long run times.

What is the capacity of Alpha Pro 3KW inverter?

This inverter is 3kw Inverter But Load Handle Capacity is 4Kw. With its 27A PV input current, the ALPHA PRO is well-suited to the increasing current output of modern solar panels. Its solar capacity is 5.5kw. These attributes make the ALPHA PRO 3KW a flexible and space-efficient choice for contemporary solar energy systems.

How does a hybrid solar inverter work?

Grid-connected mode excess solar power is fed back into the grid to offset energy consumption while also enabling battery backup functionality for critical loads during grid outages. The built-in timer in the hybrid inverter can set the machine's on/off time. The LCD panel of the hybrid solar inverter can display various detailed information.
