Photovoltaic energy storage accounts for 18 in Brno Czech Republic

Overview

How much should the Czech Republic invest in a national energy plan?

Investments by 2030 should amount to CZK 2.8 trillion. The national energy and climate plan is required by the European Commission. The Czech Republic was one of 13 EU countries that were late in submitting their plan. The Commission therefore opened infringement proceedings in November.

What will the future of electricity be like in Czech Republic?

“Electricity generation will be based on renewable sources and nuclear, and the role of gas sources can also be expected to increase,” said Vlcek. The Czech Republic did not go beyond the EU targets when setting its emission reduction targets, he added.

What is the Czech national climate and energy plan?

The Czech government has approved its National Climate and Energy Plan, which sets the key steps and goals for developing green policy and reducing emissions in the Czech Republic, Industry and Trade Minister Lukas Vlcek (STAN) announced after a cabinet meeting yesterday.

What does Hladik say about the Czech Republic's climate and energy plan?

Hladik also pointed to the security aspect of the climate and energy plan, which is intended to reduce the Czech Republic's energy dependence on foreign energy imports. This dependence is about 40% at present, and should drop to roughly 26% by 2050, he said.

How important is the Czech economic plan for investors & entrepreneurs?

Environment Minister Petr Hladik (KDU-CSL) stressed the importance of the plan for investors and entrepreneurs, and said the implementation of the plan should increase Czech GDP by 2%. Compared to the draft version from the summer, the plan approved yesterday is more general and less specific in many respects.

Did the Czech Republic go beyond EU emission reduction targets?

The Czech Republic did not go beyond the EU targets when setting its emission reduction targets, he added. Environment Minister Petr Hladik (KDU-CSL) stressed the importance of the plan for investors and entrepreneurs, and said the implementation of the plan should increase Czech GDP by 2%.
