

## SolarInnovate Energy Solutions

# Photovoltaic solar panels at the Tirana factory

## Overview

---

Is Tirana a good place to install solar panels?

Tirana, Albania, situated at a latitude and longitude of 41.3253 and 19.8184 respectively, is a favorable location for solar photovoltaic (PV) installations due to its varying seasonal average daily solar irradiance per kilowatt of installed capacity. In the summer season, it's as high as 7.85 kWh/day while in autumn it averages at 3.70 kWh/day.

How much solar energy does Tirana produce a day?

Average 5.74kWh/day in Spring. To maximize your solar PV system's energy output in Tirana, Albania (Lat/Long 41.3253, 19.8184) throughout the year, you should tilt your panels at an angle of 35° South for fixed panel installations.

How to optimize solar generation in Tirana?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tirana, Albania as follows: In Summer, set the angle of your panels to 25° facing South. In Autumn, tilt panels to 45° facing South for maximum generation.
