

SolarInnovate Energy Solutions

Photovoltaic yard solar panels

Overview

What is a ground-based solar energy system?

Ground-based solar energy systems, also known as ground-mounted photovoltaic (PV) systems, are a type of solar power system that is installed on the ground rather than on a rooftop. Unlike rooftop solar panels, ground mounted panels are not limited by the size or structure of a building and have the ability to generate more electricity.

How much does a ground-mounted solar system cost?

Ground-mounted solar panels operate like a typical rooftop system but are generally more efficient. Ground-mounted solar panel installations cost about \$42,140 after the federal tax credit. They're usually more expensive than roof-mounted systems but can maximize your renewable energy production depending on your roof's orientation and shading.

What is a ground-mounted solar power system?

A ground-mounted solar power system is just what it sounds like - a system of solar panels that are mounted on the ground on your property, rather than on the roof of your house. A ground-mounted solar power system is just what it sounds like - a system of solar panels installed at ground level, rather than on the roof of your house.

Are ground-mounted solar panels right for You?

You can even install tracking systems so your solar panels follow the sun throughout the day. Even with a big yard, ground-mounted solar setups aren't for everyone.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land,

opt for ground-mounted panels. Each property is unique.

What is a pole-mounted solar system?

Pole-mounted solar systems support multiple solar panels on a single pole and elevate panels higher off the ground than a standard ground mount. Pole-mounted solar often incorporates solar tracking systems, which automatically tilt the solar panels to capture the optimal amount of sunshine.
