## Overview

---

What is Polish Energy Storage Association?

Polish Energy Storage Association – together we are building a modern, solid and secure electric power system in Poland. We are integrating innovative companies and organisations involved in developing the power sector and environment protection, we are promoting and supporting energy storage facilities.

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.

What is Poland's energy storage program?

The program , “Electricity storage facilities and infrastructure for improving the stability of the Polish power grid,” is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Is Poland a key player in Europe's energy storage sector?

Poland is emerging as a significant player in Europe's energy storage sector. The recent capacity market auctions in December 2024 highlighted a substantial shift towards BESS, with approximately 2.5 GW secured by new generation capacity market units, predominantly Li-ion energy storage projects.

Will PGE build a battery energy storage system in Poland?

process of bidding into last year's . Polish state-owned power company PGE Group (WSE:PGE) is planning to build a battery energy storage system (BESS)

of at least 200 MW/820MWh which will be linked to an existing pumped-storage power plant in the north of Poland. The project has obtained the first license promise in Poland for electricity storage.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.
